

E-cigarettes collection service

interzero[®]
zero waste solutions

Simple, transparent, compliant – for your convenience and responsible operations.

From 1st July 2026, every business selling e-cigarettes in Germany **is required to take them back once they have been used**, regardless of the size of the shop, the sales area and the type of business (kiosk, vape shop, petrol station, online shop).

At Interzero, we offer **a comprehensive and secure solution for the collection and recycling of e-cigarettes containing lithium batteries.**

We provide:

- certified containers
- on-demand collection
- full regulatory compliance
- all logistics and documentation

With us, recycling becomes convenient, legally compliant and genuinely supports the circular economy.

Customer's value

Central coordination of all locations

Uniform recording of address and contact data for smooth processes.

Personal support

Direct access to Interzero order management (Mon–Fri via phone & email).

Clear commercial terms

Transparent prices plus VAT, 14-day net payment terms.

Contractual security

Reliable collaboration based on a clearly defined contract.

Reduced administrative burden

Centralized processing simplifies communication, billing, and controlling.

Our process

At Interzero, we offer **a comprehensive and secure solution for the collection.**

1

Initial **provision of a flame-retardant collection box** at the service location

2

Collection of **e-cigarettes**

3

Organization of **return shipping and recycling** by Interzero

4

Preparation of **volume flow and disposal certificates** (annually)

Pricing

Item	Price in euros
