

The eco-friendly **take-back system** for **paper sacks**

Benefit from taking back and recycling and document your commitment to your customers

For more than
25 years
at your service:
**competent and
sustainable**

For more than 25 years **valuable for you and the environment**

Choose the market's number 1.

With REPASACK we offer you the best practise solution for the recycling of paper sacks. As a worldwide partner for commercial and industrial customers, we organise the taking back, sorting and recycling of paper sack packaging you bring onto the German market. After being collected the used paper sacks are processed in our own recycling plant, which results in a valuable secondary raw material for the production of new paper packaging.

Become a part of an economically and ecologically valuable closed-cycle economy together with the market leader in the taking back of used paper sacks.

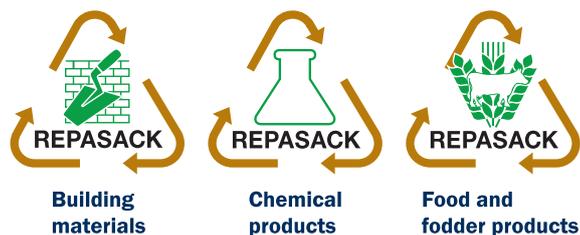

By your participation in the REPASACK system and our recycling activities, we can close the paper fibre loop together. We enable manufacturers, wholesalers, retailers, and fillers, who put paper sacks into circulation, to fulfil their legal obligations regarding the taking back and processing. We enable them to demonstrate their commitment to their customers and at the same time to contribute with their business model to climate protection.

This is how the REPASACK system works:

You agree on the use of the symbol with us. The REPASACK logo is a registered trademark and may only be used in conjunction with a specific customer registration number. This prevents any misuse. You can either obtain a license and authorise your paper sack manufacturer to print the REPASACK logo on your paper sacks on your behalf, or you buy licensed paper sacks directly from the manufacturer.

There is a different REPASACK symbol for each industrial sector – a “return ticket” for the paper sacks.

After the paper sacks are sorted according to the nature of their contents they are brought to material recycling.

Hazardous substance or pollutant? No problem!

We offer the **REPASACK-G-System** for paper sacks containing polluted fillings (“G” for Gefahrstoff = hazardous goods). In this case, you sign a separate contract with us for the appropriate processing of the paper sacks.

Legal security for you – convenience for your customers

The take-back of your paper sacks is ensured nationwide.

REPASACK stands for REcycling-PAPer-SACK. We organise the taking back and recycling for manufacturers, retailers, and fillers as well as for consumers, your customers. No matter what content, whether cement or chemicals, seeds or animal foods, sugar or flour – used kraft paper sacks need to be disposed of in many sectors. End-users can return empty REPASACK paper sacks free of charge to any of our 350 collection points throughout Germany.

Along with us recycling becomes your competitive advantage:

- As a pioneer and market leader, REPASACK offers you more than 25 years of experience in the collection and recycling of paper sacks.
- In our own recycling plant, the only one of its kind in Europe, we ensure the processing of paper fibres into a top-quality secondary raw material.
- Our price-performance ratio is fair: We offer stable prices and conditions, whichever group of substances the paper sacks are used for.
- You benefit from a long-time experience and know-how of the ALBA Group.

At www.repasack.de our customers can find their nearest collection point simply and easily. The guidelines and terms and conditions for the return of paper sacks can be found in the download section of our website.

REPASACK – an ALBA Group company:

Founded in 1992 by representatives of European and German paper/sack producers, REPASACK GmbH was in particular intended as an addition to the German packaging recycling industry. As a subsidiary of the ALBA Group, REPASACK benefits from expertise developed in more than 50 years by this international environmental services and raw materials provider. REPASACK, well-known as a specialist in the recycling of used paper sacks, is now an international leader.

Set an example for sustainability

Quality you can rely on

You can rely on our take-back system for paper sacks. The basis for this promise is thorough quality management. Our integrated management system ensures that all standards are met as regards quality, environmental, energy, working conditions, and health and safety according to the following certifications: DIN EN ISO 9001:2015, DIN EN ISO 14001:2015, DIN EN ISO 50001, BS OHSAS 18001:2007. REPASACK is also verified by the seal of quality for waste processing companies.

Precise handling according to clear guidelines

Our REPASACK logo shows that the disposal, cleaning and recycling of paper sacks is carried out in accordance

with the German packaging regulations. We ensure legal security and support you to fulfil your statutory obligations. We can provide you with our certificate as evidence for a proper recycling.

A visible expression of commitment to the environment – resources SAVED by recycling

With REPASACK you actively contribute to environmental and climate protection. And you help to ensure that future generations will not bear a long-lasting burden of pollution. The recycling of paper sacks in REPASACK's own processing plant reduces greenhouse gas emissions and saves trees from being cut down. We can certify this for you by issuing you with your own individual resources SAVED certificate.
